## Case Study

LEGATEST In-situ Testing in  
Pasir Gudang  
LEGATEST Sharing Session with  
DOSH officers in Putrajaya

HRSG & Power 2023 Highlight

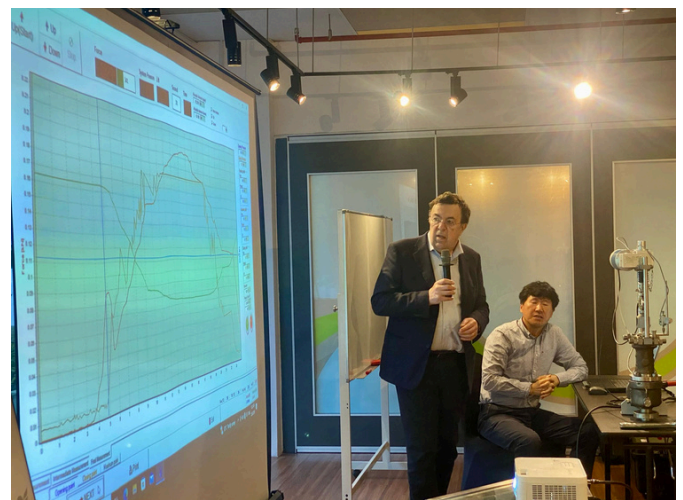

## LEGATEST

**"We work better under pressure"**

We are thrilled to announce that our company has many exciting news for sharing in 2024.

Firstly, we have successfully launched the testing and sharing session for one of our key services this year, **LEGATEST**. It is a microprocessor controlled system that use high performance sensors to automatically test safety valves to determine the opening pressure.

We trust on site inspection will be the trend and it is beneficial to time and cost saving for our valued customers in a long run. Definitely, **LEGATEST** is the best solution to you.

Sharing session with DOSH officers  
conducted by Dr. Roman

## Event Highlight

There was very good feedback from the participants in the event last year.

“

The event is very informative and succesful. Definitely I would like to join again if there's one next year

”

## Inside The Event

- Coorganised with MSIEA and supported by DOSH, HRSG and Power 2023 took place in Putrajaya last year.
- We invited renowned Korean companies to share their technical expertise in power plant and other sectors. Besides, we introduced the latest technology in HRSG with our participants.

- Yes Yes! We heard your feedback. We are pleased to announce that similar seminar is coming soon. Co-organized with IEM and supported by DOSH, we promised to bring in more local and overseas acumen and technical knowledge to this event so as to make it even more fruitful and insightful.

## GOOD NEWS!
